

CUSTOM-MADE INTERIOR DESIGN

FULL SERVICE PROVIDER FOR INTERIOR DESIGN

We are quality leader in the manufacturing of individual interior design and are an independent direct sales company of state-of-the-art kitchen technology and standard operating equipment. Since 1921 we have been designing, manufacturing and assembling food counters, refrigeration and heat technology, interior design, counter systems, and canteen kitchens at our headquarters in Röttingen. We manufacture customized turnkey systems made of stainless steel, wood, and glass. We also process other material, such as leather, textiles, natural stone, and cast stone.

Winkler Design stands for extraordinary complete solutions and state-of-the-art interior design. Each object is unique, manufactured by our 65 experts with a lot of attention to detail and a tremendous vertical range of manufacture. The combination

of handcraft, overall service, and experience makes us a much sought-after business partner for renowned industrial enterprises, institutions, the gastronomy trade, and rail car manufacturers.

Our customers profit from the flexibility of a 'small', medium-sized company on the one hand and the stability of a strong group on the other. Since 1995 Winkler Design has been doing business under the roof of the internationally active, family-owned Wirthwein-Group. With 22 companies in Europe, Asia, and the USA, the Wirthwein-Group is close to its customers around the world. More than 3,650 employees work for the group of companies in the business fields of Automotive, Railway, Electrical Industry, Home Appliances, Medical Technology, and Interior Design.

COMMUNAL CATERING AS AN EXPERIENCE

OPERATING COMFORT, HYGIENE AND ESTHETICS:
OUR COUNTER SYSTEMS MEET ALL YOUR
REQUIREMENTS – OVER MANY DECADES.

We design, manufacture, and assemble true unique pieces which will inspire both your customers and your staff. We cooperate closely with your expert planners and architects. The combination of in-house production, direct sales, and expert technical advice is unique in this industrial sector and our key to success. It is our experience and reliability as complete solution provider that has turned us into one of the global market leaders for counter systems.

ANY KIND OF PROCUREMENT, INSTALLATION,
AND ASSEMBLY SERVICE FROM ONE PROVIDER.

As an independent full-service provider we manufacture your stainless steel furniture and procure the entire brand name furnishings in compliance with all applicable hygiene and construction standards for canteen kitchens. Our experienced team of specialists ensures smooth installation and assembly of your thermal equipment as well as any rinsing, cooking and service technique – without joints, for optimum cleaning and hygiene.

For you, this means less coordination effort, quicker response time, and planning reliability.

FUNCTIONAL, MODULAR, AND EXTREMELY HYGIENIC

 ON-BOARD KITCHENS AND GALLEY SYSTEMS FOR RAIL CARS: LONG-LASTING, TAILOR-MADE SOLUTIONS.

Every day our custom-fit and durable products stand the test of international rail traffic. Not only do our on-board kitchens, counter systems, and rail alleys meet high industrial quality standards but they also resist enormous forces on rail vehicles.

Since 1960 we have been one of Europe's market leaders in the manufacturing and equipment of counter and canteen systems of the railway industry. What distinguishes us in mobile canteen technology is our unique know-how, countless processing options, and our close contact with customers. Satisfied rail passengers around the world rely on our on-board kitchens:

-  Mariazellerbahn
-  Rocky Mountaineer
-  EC 250, FV Dosto, IC 2000, SBB8
-  ICE 1, 2, 3, ET 5, ET 7
-  AVE
-  ETR 500, ETR 1000
-  Dart, Restaurant Refit, Flirt PKP
-  MTR
-  Arriva, FGW Buffet, Virgin Voyager, GNER

MAXIMUM FUNCTION IN
VERY CONFINED SPACE

EFFICIENT AND CLEAN: RINSING TECHNIQUE MADE BY GLOBAL MARKET LEADERS THAT YOU CAN FULLY RELY ON.

We offer you rinsing and conveyor systems of renowned brand-name manufacturers. With our in-house special purpose machinery we combine them with custom-fit and functional sink units, panels, splash plates, and connection modules to create efficient and durable complete solutions. Thanks to our know-how and years of experience we are able to add yet more value by ensuring quality, flexibility, and safety.

In close collaboration with our manufacturers' installation experts our technicians assemble and subsequently implement your new scullery smoothly.

Customized advice and design concept

Our customers have a reliable contact at their side who knows the specifications of the industry, understands your requirements and supports you along the entire value added. Our creations are truly unique and have to meet the highest quality, safety and esthetics standards. These are the reasons why we focus on a close personal contact with our customers.

For us, all-round service means that one and the same expert from Winkler Design is there for you to support and advise you comprehensively in each project stage. Our expert gives you all the information you need and provides you with the necessary overview. In case of particularly complex construction projects we will gladly take over coordination with all other trades to relieve you and your planners and reliably meet time schedules.

OVERALL SERVICE PACKAGE

CUSTOM-FIT SPECIAL SOLUTIONS

2D and 3D design

Our in-house design department translates the design concept results and your design requirements into high-precision, production-oriented design data. These data provide the basis for our custom-fit and durable unique products. We bring into play our knowledge of material, processing, electronics, and statutory provisions of the industry from the first draft to installation planning to

product preparation ready for production. With our state-of-the-art CAD software our experienced team of designers implements all drafts and checks each application for the most efficient processing method. Thereupon the visualization is discussed with you in detail. We can implement modification requests quickly and flexibly thanks to short distances between design and manufacturing.

Extraordinary, customized interior design

Thanks to our highly qualified team of experts most of whom have been trained in-house and our CNC-controlled machinery we are a committed, state-of-the-art factory with well-established procedures. We focus on quality specifications demanded and resource-saving production of your interior design. We are able to process almost any material on site. At our headquarters in Röttlingen we work with high-precision laser and edge-bending, milling

and sawing machines to manufacture all kinds of assembly groups and components. We integrate all required maintenance groups as well as sanitary and electrical technology. From decades of experience we have acquired comprehensive expertise particularly as regards the processing of wood and stainless steel. We assemble prototypes to check all components on dimensional accuracy, functionality, and manufacturing quality.

FOR 100 YEARS WE HAVE NOT LEFT QUALITY TO CHANCE
BUT TAKE MATTERS INTO OUR OWN HANDS THANKS TO
OUR IN-HOUSE SPECIAL PURPOSE MACHINERY.

Coordinated assembly and expert after sales service

Who would be better qualified to assemble, take into operation and maintain your system than the expert who has designed and manufactured it? We will provide you with any kind of assembly and after sales service from a single source. As soon as the system components leave our factory, our assembly professionals and experienced customer service staff take over control. With their eyes firmly on your processes and time schedule, they reliably coordinate all assembly and connecting work as well as the final startup with all trades involved.

- on-time delivery
- neat assembly
- smooth startup
- after sales service
